# What to Expect at Your Medicare Wellness Visit

Medicare Part B includes a yearly Wellness Visit for those who have had Medicare for more than 12 months. Your Wellness Visit is an important preventative treatment and includes:

- ❖ Review of medical, family and social history.
- ❖ Review of your current provider, medications and drug allergies.
- ❖ Check of your blood pressure, height, and weight.
- ❖ Check for any trouble with thinking, reasoning and memory.
- ❖ Review of functional abilities (daily living activities) and home safety (risk of falling).
- ❖ Personal health advice (weight loss, physical activity, tobacco cessation, or nutrition).
- ❖ List of suggested screenings and a screening schedule.

**IMPORTANT:** The Medicare Wellness Visit does not include a physical exam. Extra tests or services during this visit may not be covered under prevention and your coinsurance or Part B deductible may apply.
